

OUTDOOR HALF DOME RANGE

The Outdoor Acrylic Half Dome Mirror is designed for driveway safety when a driver needs to see both left and right before exiting a building to avoid collisions. The lightweight vinyl back and lid is sealed to enclose the cavity and to withstand weather. Ideal for busy forklift loading areas, warehouses, factories and industrial buildings. Also an easy way to observe children around schools or childcare centres for outdoor play areas. Complete with adjustable outdoor J-Bracket, this new innovation is one of the most effective ways to improve two-way visibility.
